DETAILED ACTION

Response to Arguments

Applicant's arguments, see Applicant interview summary/response, filed August 13, 2009, with respect to the Office Action submitted April 14, 2009 have been fully considered and are persuasive. The rejection has been withdrawn.

Allowable Subject Matter

1. Claims 1-10 are allowed. Claims 1, 7 and 9 are the independent claims.
2. The following is a statement of reasons for the indication of allowable subject matter: The closest prior art of record is US Patent No. 5,398,394 to Hyatt et al. and US Patent No. 4,553,335 to Woyton.
3. Hyatt et al discloses an axial swage alignment tool (10) for swaging together a tube (14, 16) and a fitting (12) having a swaging collar (20), the axial swage alignment tool (10) comprising: a housing (22) adapted to engage the fitting (12); a ram member (52) adapted to engage the swaging collar (20); having inner and outer engagement portions (50, 52) for maintaining the orientation of the tube (14, 16) relative to the fitting (12) during swaging (Col 4, Lines 38-50 and Line 62-Col 5, Line 5, Fig. 1).
4. Woyton discloses a bridge member (20) comprising: a first end portion (64, 66) for matingly contacting a metal tube (28); and a second end portion (64, 66) for matingly contacting a fitting (26), for properly aligning the tube (28, 30) and fitting (26) (Col 4, Lines 29-43, Figs. 1).

Art Unit: 3726

5. No prior art of record discloses an axial swage alignment tool comprising a bridge member for maintaining the orientation of the tube relative to the fitting during swaging, the bridge member being configured for adhesion to the exterior surfaces of the tube and the fitting; said bridge member comprising: a first end portion having a curved contact surface for matingly contacting the metal tube; a second end portion having a first curved contact surface for matingly contacting a longitudinal surface of the fitting and a second curved contact surface for matingly contacting a radial flange surface of the fitting; and a cross piece for connecting the first end portion to the second end portion;

or a method of swaging together a metal tube and a fitting having a swaging collar comprising the steps of: providing a bridge member having a first end and a second end, the first end having a contact surface configured to mate with the exterior surface of the metal tube, the second end having a contact surface configured to mate with the exterior surface of the fitting; adhering the contact surface of the first end to the metal tube; adhering the contact surface of the second end to the fitting; and removing the bridge member from the metal tube and the fitting.

Furthermore, there is no combinable teaching in the prior art of record that would reasonably motivate one having ordinary skill in the art to so modify the teachings of Hyatt et al. and Woyton and thus, for at least the foregoing of reasoning, the prior art of record does not render obvious the present invention as set forth in independent claims 1, 7 and 9.

Art Unit: 3726

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
